Duties and Responsibilities:

- Lead the implementation of an Integrated Water Resource Management under the Climate Resilient Rural Infrastructure (CRRIA) component.
- Contribute substantial technical input into the development and administration of water management for agriculture (Rural Water) and sustainable development.
- Review and lead the development of agricultural water management policies, strategies and plans in conjunction with the Ministry of Agriculture.
- Liaise with the Ministry of Agriculture and all relevant bodies to create synergy for the development of the relevant statutes and a step-by-step guidance for establishment of Water Users' Associations in Belize's rural areas. Assess irrigation efficiency of subprojects and incorporate measures to improve efficiency in design with consultants.
- Investigate existing irrigation systems and water management systems in the project area and develop irrigation maps describing locations or routes of irrigation facilities such as water resources, irrigated areas, canals, and pumping stations
- Develop relevant training manuals for all aspects of irrigation management including operations of Water Users' Associations, crop water requirement, irrigation scheduling, methods of irrigation, irrigation service fee determination and application, financial management of WUAs, decision making, conflict resolution etc.
- Provide relevant support and training to group of farmers for establishment of their WUAs and on operational aspects.
- Participate and contribute to discussions with applicant, design companies and other interested parties in decision making during the construction stage.
- As a member of the PMU, prepare annual work plans and budgets for institutional development related activities, provide reports and information on infrastructure investment operations as necessary to the Programme Manager and contribute to progress reports.
